# **GROUP FITNESS DIRECTORS**

Interested in making your job easier?

# **GroupEx PRO** is the answer.

GXP is an all-in-one, web-based solution designed to streamline communication with your team while organizing the critical areas you manage daily. Designed by veteran GFMs, GroupEx PRO® optimizes current processes, eliminates unnecessary stress and paperwork, all while saving time and heightening engagement with your team, as well as your members.

# SAVE COUNTLESS HOURS AND GET BACK TO THE 'GOOD STUFF'.

### COMMUNICATION

A central location for department wide communication; instead of sending out long emails send short snippets, easily track who read the notice and archive for future reference.

#### **SCHEDULE**

Real-time, easily updated schedule for both instructors and members. Sort by day, class type, instructor or location for customized viewing.

#### REPORTING

A one-stop shop for managers to review numbers, determine class value and make decisions regarding their program. Instructors can be given the ability to add class numbers from any computer or smartphone ... no more paper!

# **CALENDAR**

Post internal notifications of special events or deadlines; include notes about registration deadlines, create RSVP lists and more.

# **INSTRUCTOR APP**

A free app that allows instructors to manage their work on the go! Request subs, respond to sub requests, enter class numbers, read notices, and receive push notifications for urgent correspondence.

# **CONTACT LIST**

Track custom information and receive reminders (such as certification expiration) based on date, send emails to groups of instructors and view GroupEx PRO activity statistics for objective performance review throughout the year.

### **MANAGE SUBS**

Provides a workflow for requesting and approving subs. Instructors post open classes and subs simply click to let you know their availability. Once approved, the instructors are notified and the sub name appears immediately on the GXP calendar and your club's schedule. If you've integrated your schedule with Facebook, a club App or digital display, sub updates appear there, as well.
